# SCAMPER

Coming Up With Ideas for  
Improving Your Products  
and Services

# CHAQUETODO

- ☐ we have chosen this object because ...
  - it is the future
  - and also I would like to have a copy in my house (and a reptile, why not?)
  - and we thought that it needed many modifications

# IDEAS

- It's an all-inclusive jacket:
- a mobile in the sleeve
- a sanitary computer in the arm
- a hooves in the hood
- hood with smart glasses that work with solar energy with plates on the part of the hood
- It has zippered sleeves so that we can remove them
- has a kangaroo in the back area
- in one of the sleeves has a device with pepper gas in case you have to protect yourself from some type of stalker

- device to carry babies
- there are also other reptile jackets because when cleaning the terrarium you can get bad at low temperatures so they are thermal

# OPINION

★ in conclusion we think it has been a very entertaining work since it stimulates our imagination a lot and is a more entertaining way to learn

# THE MOST DIFFICULT PART OF THE METOD SCAMPER

- the most difficult part of the SCAMPER method was to combine the jacket with the computer, because the combination of a garment with technology has to be well organized so that all its functions are fulfilled.

**THE END**
